

CHAPS & MORE

your partner for knee and wetness protection

Chaps – the perfect protection for your knees and legs !

Wetness protection

✓ absolutely waterproof

Model 13.001 (green) + 13.000 (grey) + 13.003 (orange)
(registered patent)

Chaps provide perfect protection when working with electric trimmers or liquids. Without knee pad, open at the back. Fixed with snap fasteners. Protects against loose stones and chippings. Model 13.003 in warning colour to DIN EN 471, with velcro fasteners.

Model 13.021 (green)

In green with additional foot protection.

Model 13.051 (short, green) + 13.061 (long, green)

Wetness protection around the leg when coming into contact with wet cultures, e.g. tree nurseries, forestry, agriculture, hunting, vegetable gardening etc. Water, tear and thornproof, fastens around the leg with velcro on the sides. Available in 2 different lengths.

Model 13.080 (grey)

Spray protection, to step into with hemline slits

Model 18.050 (grey)

Gaiters to protect lower legs against wetness and snow. An elasticband underneath the shoe and velcro fasteners at the side ensure a tight fit and keep your trousers dry.

Knee protection

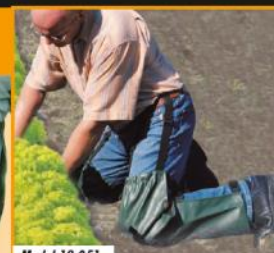

✓ with knee pad

✓ extremely durable

✓ no discomfort

in the back of the knee

✓ absolutely waterproof

Model 12.051

Model 12.051

Model 12.051

Model 12.070 + 12.071

Model 12.051 (green)

For garden work. Open at the back, with velcro fasteners and knee pad 10.000. Can also be used with knee pad 10.050.

Model 12.070 (grey) + 12.071 (green) + 12.073 (orange)

For pavement work. Open at the back, with snap fasteners and knee pad 10.050. Model 12.073 in warning colour to DIN EN 471.

Our high quality knee protectors

"SELECT & MORE" Model 70.600

The extremely robust, high quality gel knee protector is fixed by elastic neoprene straps with velcro fasteners - clearly outside the knee. "Memory foams" and an ultra soft ring gel pad guarantee an ideal cushioning. Because of the unique patented inside coating, the knee protector does not slip off the knee. The lateral high connection to the leg, prevents dropping in stones and sand.

"FLEXIBLE & MORE", Model 70.010

Very comfortable fit because of an gel and EVA foam cushion. One elastic neoprene strap and one elastic strap - which is optionally removable - allow freedom of movement and maximum comfort. Suitable for every kind of surface because of the smooth and robust plastic cap.

"SECURE & MORE", Model 70.200

The robust knee protector is useable for every area. For interior works the very robust plastic cap can be taken off by means of Velcro fastenings. Very good impact deflection and maximum comfort because of a gel and EVA cushion. The flat plastic cap also guarantees high stability for the knees.

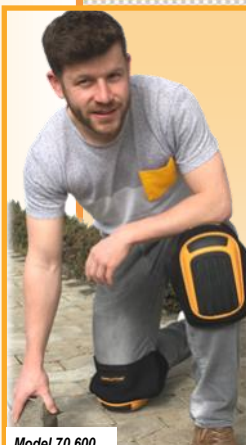

Model 70.400

For all craftsman which do not like big knee protectors but love to kneel beautifully soft. Excellent shape with thick gel pads and special patented foams guarantee perfect impact deflection and allow freedom of movement. It is water resistant and to fasten with elastic velcro straps.

"Proven More", Model 70.110(B)

Price aggressive knee pad with gel and EVA foam cushion. One elastic neoprene strap with Velcro fastening closes right below the knee - therefore no constriction in the back of the knees.

Model 70.600

Cut protection

Model 80.001

Very light cut protection Chaps in green.

According to Category A, protection class 1, DIN EN 381-5.

Universal size, adjustable at the waist and open at the bottom. Hemline slits with included zipper - easy to put on. Front wedges in warning color on the lower leg.

Model 80.001
